However, we urge investors and reporters to read our 10-Q, which has been posted at www.berkshirehathaway.com. *The limited information that follows in this press release is not adequate for making an informed investment judgment.*

Generally Accepted Accounting Principles (“GAAP”) require that we include the changes in unrealized gains/losses of our equity security investments as a component of investment gains/losses in our earnings statements. In the table above, investment gains (losses) in 2022 include losses of \$53.0 billion in the second quarter and \$53.8 billion in the first six months and in 2021 include gains of \$21.0 billion in the second quarter and \$23.8 billion in the first six months due to *changes* during the second quarter and the first six months in the *unrealized* gains that existed in our equity security investment holdings. Investment gains (losses) in 2022 also include after-tax realized gains on sales of investments of \$44 million in the second quarter and after-tax realized losses of \$568 million in the first six months and in 2021 include after-tax *realized* gains on sales of investments of \$183 million in the second quarter and \$1.6 billion in the first six months.

The amount of investment gains/losses in any given quarter is usually meaningless and delivers figures for net earnings per share that can be extremely misleading to investors who have little or no knowledge of accounting rules.

An analysis of Berkshire’s operating earnings follows (dollar amounts are in millions).

Approximately \$1.0 billion was used to repurchase Berkshire shares during the second quarter of 2022, bringing the six-month total to \$4.2 billion. At June 30, 2022, insurance float (the net liabilities we assume under insurance contracts) was approximately \$147 billion, relatively unchanged from yearend 2021.

Use of Non-GAAP Financial Measures

This press release includes certain non-GAAP financial measures. The reconciliations of such measures to the most comparable GAAP figures in accordance with Regulation G are included herein.

Berkshire presents its results in the way it believes will be most meaningful and useful, as well as most transparent, to the investing public and others who use Berkshire’s financial information. That presentation includes the use of certain non-GAAP financial measures. In addition to the GAAP presentations of net earnings, Berkshire shows operating earnings defined as net earnings exclusive of investment and derivative gains/losses and impairments of goodwill and intangible assets.

Although the investment of insurance and reinsurance premiums to generate investment income and investment gains or losses is an integral part of Berkshire’s operations, the generation of investment gains or losses is independent of the insurance underwriting process. Moreover, as previously described, under applicable GAAP accounting requirements, we are required to include the changes in unrealized gains/losses of our equity security investments as a component of investment gains/losses in our periodic earnings statements. In sum, investment gains/losses for any particular period are not indicative of quarterly business performance.
