Berkshire’s operating results for the second quarter and first six months of 2026 and 2025 are summarized in the following paragraphs. However, we urge investors and reporters to read our 10-Q, which has been posted at www.berkshirehathaway.com. *The limited information that follows in this press release is not adequate for making an informed investment judgment.*

In the table above, investment gains (losses) in each period predominantly relate to our investments in equity securities. Generally Accepted Accounting Principles (“GAAP”) require that we include the changes in unrealized gains (losses) of our equity security investments as a component of investment gains (losses) in our earnings statements. Investment gains (losses) in 2026 include gains of \$10.9 billion in the second quarter and \$3.9 billion in the first six months and in 2025 include gains of \$1.5 billion in the second quarter and losses of \$5.9 billion in the first six months due to *changes* during the second quarter and the first six months in the *unrealized* gains that existed in our equity security investment holdings. Investment gains (losses) in 2026 also include after-tax realized gains on sales of investments of \$1.8 billion in the second quarter and \$7.5 billion in the first six months and in 2025 include \$4.2 billion in the second quarter and \$6.6 billion in the first six months. Investment gains (losses) in the table above also include losses of \$0.7 billion in the second quarter and first six months of 2025 from other investments.

The amount of investment gains (losses) in any given quarter is usually meaningless and delivers figures for net earnings per share that can be extremely misleading to investors who have little or no knowledge of accounting rules.

An analysis of Berkshire's operating earnings follows (dollar amounts are in millions).

Use of Non-GAAP Financial Measures

This press release includes certain non-GAAP financial measures. The reconciliations of such measures to the most comparable GAAP figures in accordance with Regulation G are included herein.

Berkshire presents its results in the way it believes will be most meaningful and useful, as well as most transparent, to the investing public and others who use Berkshire's financial information. That presentation includes the use of certain non-GAAP financial measures. In addition to the GAAP presentations of net earnings, Berkshire shows operating earnings defined as net earnings exclusive of investment gains (losses), impairments of goodwill and intangible assets and other-than-temporary impairments of equity method investments.

Although the investment of insurance and reinsurance premiums to generate investment income and investment gains or losses is an integral part of Berkshire's operations, the generation of investment gains or losses is independent of the insurance underwriting process. Moreover, as previously described, under applicable GAAP accounting requirements, we are required to include the changes in unrealized gains (losses) of our equity security investments as a component of investment gains (losses) in our periodic earnings statements. In sum, investment gains (losses) for any particular period are not indicative of quarterly business performance.
